PROFILE

Junior full-stack web developer completing a degree in Information and Electronic Engineering at the International Hellenic University. I build web applications across the stack: React and Next.js on the front end, Node.js, Express and MongoDB on the back end, with SQL (MySQL) for relational data. I also run IT for a family wholesale business, where I set up its ERP and website, so I understand the business processes software has to serve. I enjoy turning a real problem into a working prototype fast and iterating with its users, using AI-assisted tools while understanding and owning the code.

EXPERIENCE

IT & Operations — Afoi Diamantidi O.E. Dec 2023 – Present
Family wholesale business (cash & carry), Kilkis · afoidiamantidi.gr

- Set up and configured SoftOne Cloud ERP/CRM, moving stock, orders and customer data into one system.
- Built and maintain the company website on WordPress.
- Manage inventory and handle all IT: building workstations, printers and hardware.

IT Intern — Zincometal May 2023 – Nov 2023
Thessaloniki, Greece

- Built and deployed the company website, taking it from development to a live production site.
- Provided IT help-desk support to staff: troubleshooting hardware, software and network issues.

PROJECTS

ThesKourema — Next.js · React · TypeScript Aug 2026 – Present

- AI receptionist SaaS for barbershops, in development. As frontend developer I built the booking dashboard: calendar view, staff management and scheduling settings.
- Built with Next.js 16, React 19 and TypeScript, integrated with a Go REST API.
- *Private codebase · demo available on request.*

AI Financial Dashboard — Bachelor's thesis · Next.js · TypeScript GitHub · Oct 2025

- Full-stack web app for analysing stock and crypto trends, pulling market data from the Finnhub and CoinGecko APIs into interactive charts.
- Integrated Google Gemini to analyse 30 days of price data and answer questions on a stock's outlook, risk and recent trend, and to summarise market news.
- Built user watchlists, price alerts and personalised daily news emails, run as event-driven background jobs with Inngest on MongoDB Atlas.

Personal Portfolio — React · Vercel live site

- Current site: a simple, responsive React portfolio deployed on Vercel.
- In progress: a brand-new portfolio built from scratch with GSAP animations and 3D interactions.

EDUCATION

Degree in Information and Electronic Engineering 2018 – 2026
International Hellenic University (IHU), Thessaloniki
Studies completed; degree to be awarded. Thesis: *AI Financial Dashboard*, a web app for AI-assisted analysis of financial data.

SKILLS

Front end	React, Next.js, JavaScript, TypeScript, HTML, CSS, Tailwind CSS, Figma
Back end	Node.js, Express, REST API design, Inngest (background jobs)
Data	MongoDB, MySQL / SQL
Also	Java, Python, Git/GitHub, WordPress, SoftOne ERP/CRM, AI-assisted development
Languages	Greek (native), English (fluent)
